

MOHAMMED KAIF

9360449767 - mohammedkaif0903@gmail.com - Chennai, Tamilnadu

SUMMARY

Motivated Junior QA Engineer with skills in manual testing, test case design, defect tracking, and cross-functional collaboration. Experienced in testing AI-driven healthcare and logistics applications using QA methodologies like SDLC, STLC, functional, regression, UI/UX, and negative testing. Proficient in executing smoke/sanity tests, reporting bugs, and ensuring product quality across platforms. Seeking to apply a quality-first approach in a fast-paced, agile tech environment.

WORK EXPERIENCE

Junior Quality Testing Engineer At ADSHI5 (Payroll: Medify)

March 2025 - Present

Projects:

◆ **CareScribe (AI-Powered Tool)**

- **Functional Testing:** Ensured all features like recording, summary generation, OPD sheet creation, and export worked as intended.
- **Regression Testing:** Validated that new feature updates didn't break existing functionality.

◆ **SFL Worldwide (Global Shipping Platform)**

- Performed system, integration, and cross-browser testing for booking, tracking & payment flows.
- Ensured compatibility across devices and validated edge cases with boundary value testing.

◆ **Kuraray Chatbot (Support Bot for Manufacturing Client)**

- Tested user flow logic, NLP responses, and fallback handling for a global chemical brand.

Process Executive At ATOS (Payroll: Compunnel)

September 2024 - March 2025

- Managed sales processes, ensuring timely and accurate completion of customer transactions.
- Delivered exceptional customer service, addressing inquiries and resolving issues efficiently.

EDUCATION

Vels Institute of Science, Technology & Advanced Studies

May 2021 - May 2024

UG (Bachelor of Computer Applications)

Classification: First Class (CGPA: 7.0)

SKILLS

- **Client & Team Coordination:** Acted as a bridge between clients and development teams to ensure requirement clarity and timely delivery
- **Manual Testing:** Strong knowledge of smoke testing, component testing, integration testing, system testing, adhoc testing, sanity testing, regression testing, usability testing, performance testing, compatibility testing, exploratory testing, globalization testing and acceptance testing. Skilled in writing detailed test cases and test scenarios by applying black box techniques.
- **Documentation:** Preparation of requirement documents, test plans, test scenarios, traceability matrices, and test summary reports
- **Software Development:** Proficient in various (SDLC) methodology, including Waterfall, Spiral, V&V, Prototype, Customized, Hybrid, and Agile.
- **Tools & Technologies:** Experienced with Redmine for project management, Sauce Labs for cross-browser testing, Microsoft Excel for test case preparation, Figma for UI/prototype design, Google Docs for documentation, and Postman for validating AI and API responses.
